## A Patient Centered Approach

In today's world, it can be difficult and confusing to coordinate and schedule the various appointments needed after seeing an orthopedic physician. Concierge services at St. Charles Orthopedics are a complimentary service designed to help our patients have a seamless experience from their initial appointment through the steps that follow: diagnostic testing, physical therapy and, when necessary, surgery. This service is part of our pledge to deliver health care with hospitality.

### Patient Liaison:

Our dedicated scheduling coordinator will navigate you through the process by scheduling imaging appointments, obtaining pre-authorization from your insurance company and scheduling appointments for physical therapy.

### Convenient and fast imaging appointments:

Imaging appointments are offered 5 days a week and often patients are able to have their imaging performed the same day as they meet with their physician.

***St. Charles Orthopedics accepts most insurances.***

## My Chart:

We want our patients to be educated and engaged in their own health care and are proud to offer MyChart, a secure portal customized by Epic for CHS. With MyChart, you can log in on your home computer or compatible smart phone/tablet to view your medication list and available lab and imaging results or to download a copy of your clinical summary following inpatient or outpatient care provided at our facilities. Other viewable content includes your medical history, allergies and immunization record. To set up a MyChart account visit: [www.stcharles.org](http://www.stcharles.org)

## Board Certified Radiologists:

Our dedicated team of radiologists is sub-specialty-trained, board certified physicians committed to providing top quality care using the latest technologies. With more than three dozen radiologists on staff, and access to state-of-the-art expertise through the resources of Catholic Health Services, patients receive the highest quality, most technologically advanced imaging services. The Department of Radiology is accredited by the American College of Radiology in Magnetic Resonance Imaging (MRI), Mammography, Computed Tomography (CT), Ultrasound (US) and Nuclear Medicine.
